

```
// ** First build an ExpressDataSet
Step::RefPtr< ifc2x3::ExpressDataSet > mDataSet =
    new ifc2x3::ExpressDataSet();

// ** Then, build the header
Step::SPFHeader theHeader;
theHeader.getFileDescription().description.push_back("A very simple model built from CSTB Ifc2x3 C++ SDK");
theHeader.getFileSchema().schemaIdentifiers.push_back("IFC2X3");
mDataSet->setHeader(theHeader);
```
